VISTA Regression Tests

VISTA Version: 0.96

[1 Login] [2 Profile] [3 Data Room] [4 Notifications] [5 Map-wide] [6 Focus Areas] [7 VISTA Score] [8 Asset Details] [9 Exposures] [10 Interventions]

Login

TC - 1

Pre-conditions: You will need a registered VISTA user.

TC 1.1 - Successful Login	Expected Results	
Given I login to the NDTP app with valid credentials **When** I click the VISTA application **Then** I see the map view	Upon login the user should be on the Map view and, on the top bar see: • Data Room • Map • Scenario Code & Name • Notifications • Profile Menu	 Map view

TC 1.2 - Successful Logout	Expected Results	
Given I log into the NDTP app with valid credentials **And** I click the VISTA application **And** I click the profile menu **When** I click sign out **Then** I am logged out	The user should be able to log out via the profile menu options	 Login page

Profile

TC - 2

TC 2.1 - View my profile	Expected Results	
Given I click the profile menu **When** I click the My Profile option	The user should be able to view their own profile page, displaying: • Member since • Added by	 My Profile page

Then I see the My Profile page	• User type • Email address • Organisation	

Pre-conditions: You will need to be logged in as an admin user.

TC 2.2 - View another users profile	Expected Results	
Given I am logged in as an admin user **And** I click the Admin Settings option **And** I see the Admin Settings page **When** I click on a listed users name **Then** I should see the users profile page	The admin user should be able to view the Admin Settings page and see: • Users tab • Invites tab • Groups tab • Access Requests tab The Users tab should be selected by default and the user should see a list of users. The user should be able to navigate to the profile page of any listed user and see: • Member since • Added by • User type • Email address • Organisation	 Admin Settings page User Profile page

TC 2.3 - Create new user group	Expected Results	
Given I am on the admin settings page **And** I click the groups tab **When** I click create new group **And** I enter a group name **And** I click save	The user should be able to create a new user group which will include all admins by default.	 A new user group

Then I see a new user group created		

TC 2.4 - Edit a user group	Expected Results	
Given I click on an existing user group **When** I rename the user group **And** I click edit members **And** I change the selected members **And** I click save **Then** I see the user group name change saved **And** I see the members of the group updated	The user should be able to rename a user group and edit the members in the group.	 Successfully saved changes to a user group

TC 2.5 - Delete a user group	Expected Results	
Given I click on an existing user group **When** I click delete group **And** I enter delete to confirm **Then** I see the user group is deleted successfully	The user should be able to delete a user group.	 User group successfully deleted

TC 2.6 - Invite a new user to VISTA	Expected Results	
Given I am on the admin settings page **And** I click the invites tab **When** I click invite new user **And** I enter a new user email address **And** I select a user type **And** I click send invite **Then** I see a successful invite sent message **And** I see a pending invite for the user on the invites tab	The admin user should be able to send an invite for VISTA to a new user. The user should see the invite that was sent with a 'Pending' status in the invites tab and the correct details with it. The invited user should receive an email with a temporary password they can use	 Invite new user page A pending invite  The VISTA invite email

	to complete signing up to VISTA (NDTP account with VISTA access).	

TC 2.7 - Re-invite user to VISTA	Expected Results	
Given I have a pending invite **When** I click the ellipsis on the pending invite **And** I click re-invite **Then** I see a message confirming the re-invite is successful **And** I see the invite with a status of pending	The user should be able to re-invite a user that has a pending invite.	 Re-invite user option Re-invited successfully message displayed

TC 2.8 - Remove a pending invite	Expected Results	
Given I have a pending invite **When** I click the ellipsis on the pending invite **And** I click remove invite **Then** I see the invite is removed from the list of invites	The user should be able to remove a pending invite and see a message confirming the removal to be successful.	 Invite removed successfully

Data Room

TC - 3

Pre-conditions: You will need to be logged in as an admin user.

TC 3.1 - Load a Scenario	Expected Results	
Given I have loaded the Data Room page **And** I click Load Scenario **And** I choose a Scenario type **When** I confirm a scenario to load **Then** a new scenario is loaded on the Map	The admin user should be able to navigate to the Data Room page, click 'Load scenario' and confirm.	 Data Room page Choose a scenario

TC 3.2 - Cancel loading a Scenario	Expected Results
Given I have loaded the Data Room page **And** I click Load Scenario **And** I choose a Scenario type **When** I click Cancel **Then** the Choose scenario window will close **And** no new scenario is loaded on the Map	The admin user should be able to cancel loading a scenario.

TC 3.3 - Load a Scenario from Map view	Expected Results	
Given I have loaded the Map view **And** I click the Scenario name in the top bar **And** I choose a Scenario type **When** I confirm a scenario to load **Then** a new scenario is loaded on the Map	The admin user should be able to load a scenario from the Map view by selecting the Scenario Code/Name in the top bar.	 Scenario Name / Load a Scenario

TC 3.4 - Load a previous Scenario	Expected Results
Given I have made changes to a scenario **And** I load a different scenario **And** I make changes to the new scenario **When** I load the previous scenario **Then** I should see the changes I previously made	The user should be able to make changes to a scenario: • Create focus areas / route plans etc. • Enable assets/exposure layers etc. The user should then be able to switch to a different scenario, make changes, load the previous scenario and see the changes they had made to the first scenario still saved.

Pre-conditions: TC 3.5 will require at least 2 users and at least 1 of those will need to be an admin. In this test scenario: User A =

Any user, User B = Admin user.

TC 3.5 - Load a Scenario with Multiple users	Expected Results	WIP
Given user A is logged into VISTA **And** user B is logged into VISTA **When** user B loads a different scenario **And** user A interacts with an asset or exposure **Then** user A is notified the scenario has changed	WIP: User A should be notified that the scenario has changed. The user should refresh in order to be able to continue using VISTA, with the latest scenario.	 User B trying to enable an exposure layer

TC 3.6 - Data Source Details	Expected Results	
Given I have loaded the data room page **And** I type in the search bar **And** I select a data source from the results **Then** I see the data source details **And** I see a link for more information about the data source	The user should be able to see a list of Data Sources, displaying: • Data Source name • Owner • # of assets • Last updated The user should see the “Should this data be available to all?” option is present and set to “Yes” by default. The user should also be able to search for a specific Data Source, click on it and see the details for that Data Source.	 Data Source search Data Source details for OS NGD

TC 3.7 - Data Source group restrictions	Expected Results	
Given I have loaded the data room page **And** I have clicked on a data source **When** I assign access for a data source to a selected group **And** I click save **Then** I see the data sources group access is restricted to an assigned group	The Admin user should be able to restrict data source access to a specific group(s).	 Data sources page should the group access for each Data source

TC 3.8 - Manage scenario page	Expected results	
Given I am logged in as an admin user **When** I click Data Room **And** I click manage scenario **Then** I see the manage scenario page	The admin user should be able to navigate to the manage scenario page. The user should see a list of scenarios, their incident type and be able to see which scenario(s) are currently active and inactive.	 Manage scenario page

TC 3.9 - Accept user drawn exposure	Expected Results	
Given I am on the scenario page **And** I have a user drawn exposure submitted in the data room **When** I accept the user drawn exposure **Then** I see a user drawn exposure in the available exposures list	The admin user should be able to accept a user drawn exposure submitted to the Data Room. The admin user should see the accepted exposure become part of the globally available exposures for the selected scenario.	 2 pending user drawn exposures User drawn exposure added to 'Available' exposures

		 User drawn exposure given the 'UD.' tag and now is no longer editable

TC 3.10 - Reject user drawn exposure	Expected Results	
Given I am on the scenario page **And** I have a user drawn exposure submitted in the data room **When** I reject the user drawn exposure **Then** I do not see a user drawn exposure in the available exposures list	The admin user should be able to reject a user drawn exposure submitted to the Data Room. The admin user should not see the rejected exposure become part of the globally available exposures for the selected scenario. The user who submitted the exposure should see the exposure become editable again in the panel.	 Pending user drawn exposure User drawn exposure has become editable again after rejection

TC 3.11 - Manage scenario - map filtering	Expected Results	
Given I am on the edit scenario page **When** I draw a filter area on the scenario map **Then** I see the scenario map filter the assets in the drawn area **And** I see the list of assets display the filtered assets only	The user should be able to filter the visible assets on the scenario map by drawing a polygon. The user should see the list of assets only display the relevant assets.	

TC 3.12 - Change an assets criticality score in-line	Expected Results	
Given I am on the edit scenario page **And** I double click the criticality score of an asset in the list **And** I change the criticality score **When** I click save **Then** the criticality score of the asset is updated	The user should be able to change the criticality score of 1 asset in-line at a time and save any changes made.	 Change criticality score in-line Confirm saving changes made to criticality scores

TC 3.13 - Cancel saving an assets criticality score	Expected Results
Given I am on the edit scenario page **And** I double click the criticality score of an asset in the list **And** I change the criticality score **When** I click save **And** I cancel saving **Then** the criticality score of the asset is not updated	The user should be able to cancel saving any changes made to asset criticality scores.

TC 3.14 - Asset filtering on scenario page	Expected Results	
Given I am on the edit scenario page **When** filter the category **And** I filter the sub category **And** I filter the asset type **Then** I see the scenario map filter the assets **And** I see the list of assets filter the assets	The user should be able to use the category, sub-category and asset type dropdown options to filter the available assets in the scenario. The user should not require all 3 categories to be specified, any combination of the 3 should be possible.	 Assets filtered by category, sub-category, asset type.

TC 3.15 - Bulk criticality score changes	Expected Results	

Given I am on the edit scenario page **And** I select multiple assets on the scenario page **When** I click edit x selected **And** I enter a criticality score **And** I click confirm **Then** I see all selected asset criticality scores are updated **And** I see all updated assets highlight orange	The user should be able to select multiple assets and change their criticality scores in bulk before saving. The user should also see all assets with pending changes highlighted in orange.	 Bulk edit criticality scores of assets Assets with pending changes highlighted in orange

Notifications

TC - 4

TC 4.1 - View Notifications	Expected Results	
Given I am logged into VISTA **When** I click the Notifications bell icon **Then** I see the Notifications page	The user should be able to navigate to the Notifications page.	 Notifications page

Map-wide

TC - 5

TC 5.1 - Enable Assets Individually	Expected Results	
Given I have the Map-wide view enabled **When** I enable assets in the asset panel **Then** I see all enabled assets on the Map-wide view	On the Focus Area panel, “Map-wide” should be enabled by default. On the “Assets” panel, “Map-wide” should be the default for the “select visible focus area” dropdown. The user should be able to enable assets on the Map-wide view.	 Enabled assets on Map-wide view

TC 5.2 - Enable all Assets for a category	Expected Results	
Given I am on the Asset panel **When** I click the eye next to a category **Then** all assets for a category are enabled **And** I see all enabled assets on the Map-wide view	The user should be able to enable all the assets for an asset category at once.	 Enabled all assets in a category

TC 5.3 - Disable Assets Individually	Expected Results	
Given I have enabled assets on the Map-wide view **When** I disable assets in the asset panel **Then** I do not see any disabled assets in the Map-wide view	The user should be able to disable assets on the Map-wide view.	 Map-wide view after disabling multiple asset types

5.4 - Disable all Assets for a category	Expected Results	
Given all assets for a category are enabled **When** I click the eye next to a category **Then** all assets for a category are disabled **And** I do not see any enabled assets on the Map-wide view	The user should be able to disable all the assets for an asset category at once.	 Disable all assets in a category

TC 5.5 - Disable all Assets	Expected Results	
Given I have enabled assets on the Map-wide view **When** I click the Clear All button **Then** all assets for my focus area will be disabled **And** I do not see any assets on the Map-wide view	The user should be able to disable all assets on the Map-wide view at once.	 Clear All button

TC 5.6 - No Asset Information	Expected Results	
Given I have no assets enabled **When** I click the asset information button **Then** I see no asset information displayed	The user should not see any asset listed under the asset information window if no assets are enabled. The user should see an information message.	 Asset Information window with no assets enabled

TC 5.7 - Asset Information	Expected Results	
Given I have enabled assets on the Map-wide view **When** I click the asset information button **Then** I see all enabled assets listed in the asset information window	The user should be able to see all enabled assets on the Map-wide view listed in the asset information window, displaying: • Asset ID • Name • Type • Longitude • Latitude	 Asset Information window with enabled assets listed

TC 5.8 - Map navigation	Expected Results	
Given I rotate the map **And** I click the zoom in button **And** I click the zoom out button **And** I select a different map style **When** I click the reset view to north button **Then** the map view resets to north	The user should be able to zoom in and out on the map. The user should be able to change map styles. The user should be able to reset the map orientation to north.	 Map styles

TC 5.9 - Enable Map-wide Exposure Layers	Expected Results	
Given I have assets enabled **And** I am on the exposure panel **When** I enable floods **And** I click the eye next to the environmentally sensitive areas category **Then** I see all environmentally sensitive areas on the map **And** I see all enabled flood areas on the map	The user should be able to enable floods and environmentally sensitive areas on the map-wide view while assets are enabled.	 Floods, Environmentally Sensitive Areas and Assets enabled on the map.

TC 5.10 - Disable Map-wide Exposure Layers	Expected Results	
Given I have assets enabled **And** I have floods enabled **And** I have environmentally sensitive areas enabled **When** I click the eye next to the environmentally sensitive areas category And I disable floods **Then** no environmentally sensitive areas are displayed on the map **And** no flood areas are displayed on the map	The user should be able to disable all exposures.	 Environmentally Sensitive Areas show/hide all button

TC 5.11 - Create a Route	Expected Results	
Given I have assets enabled **And** I have floods enabled **And** I have environmentally sensitive areas enabled **And** I am on the utilities panel **When** I select route start and end locations **Then** I see a calculated route displayed on the map	The user should be able to calculate a route on the map with various assets, floods and ESA's enabled.	 Route planned and displayed

TC 5.12 - Re-calculate a Route	Expected Results	
Given I have a calculated route displayed on the map **When** I change the start location **And** I change the end location **Then** I see a re-calculated route displayed on the map	The user should be able to re-calculate an existing route on the map.	 Re-calculated start location  "Loading route..." while re-calculating Re-calculated end location

TC 5.13 - Search bar - Address	Expected Results	
Given I am on the map view **When** I enter an address in the search bar **And** I click a suggested result **Then** I see the map zoom into the selected area	The user should be able to search the map by using an address or partial address in the search bar (including post codes). The user should be zoomed into the relevant area view of a selected area in the search bar.	 Search bar's suggested results from a partial address

TC 5.14 - Search bar - Asset ID	Expected Results	
Given I am on the assets panel **And** I enable an asset **And** I click on an asset on the map **When** I click an asset id to copy it **And** I paste the asset id into the search bar **And** I click a suggested result **Then** I see the map zoom into the selected area	The user should be able to use the asset id against an asset on the map to search for it in the search bar.	 Copy asset id Enter asset id into search bar Zoomed into assets location

Focus Areas

TC - 6

TC 6.1 - Create a Circle Focus Area	Expected Results	
Given I am on the focus area panel **And** I have clicked draw new focus area **When** I click draw circle **And** I click and drag my mouse **Then** I create a circle focus area on the map **And** I see a focus area in the focus area panel	The user should be able to create a circle focus area by clicking and dragging.	 Circle Focus Area

TC 6.2 - Create a Circle Focus Area with Click	Expected Results	
Given I am on the focus area panel **And** I have clicked draw new focus area **When** I click draw circle **And** I click a desired centre point on the map **And** I enter a circle radius **Then** I create a circle focus area on the map **And** I see a focus area in the focus area panel	The user should be able to create a circle focus area by clicking and specifying the radius.	 Enter circle radius

TC 6.3 - Create a Polygon Focus Area	Expected Results	
Given I am on the focus area panel **And** I have clicked draw new focus area **When** I click draw polygon **And** I draw a polygon on the map **Then** I create a polygon focus area on the map	The user should be able to create a polygon focus area.	 Polygon Focus Area

And I see a focus area in the focus area panel		

TC 6.4 - Edit a Focus Area	Expected Results	
Given I have a focus area **And** I click edit name on a focus area **When** I change the name of a focus area **And** I move a focus area **And** I edit the focus area shape **Then** I can edit the name of a focus area **And** I can move a focus area **And** I can edit the focus area shape	The user should be able to rename a focus area. The user should be able to click a focus area on the map and move it. The user should be able to double click a focus area on the map and edit the focus area polygon's vertices.	 Rename a Focus Area Moved Focus Area

TC 6.5 - Enable Assets in Focus Area	Expected Results	
Given I have a focus area **And** I am on the assets panel **And** I select a focus area in the select focus area dropdown **When** I enable assets **Then** I see the enabled assets on the map	The user should be able to enable assets for a focus area.	 Focus Area with enabled assets

TC 6.6 - Disable Assets in Focus Area	Expected Results
Given I have a focus area **And** I am on the assets panel **And** I select a focus area in the select focus area dropdown **And** a focus area has enabled assets **When** I disable assets **Then** I do not see assets on the map	The user should be able to disable assets for a focus area.

TC 6.7 - Cancel Deleting a Focus Area	Expected Results	

Given I have a focus area **And** I am on the focus area panel **When** I click delete **And** I cancel delete **Then** I have a focus area	The user should be able to cancel deleting a focus area and it remain.	 Delete Confirmation window

TC 6.8 - Delete a Focus Area	Expected Results
Given I have a focus area **And** I am on the focus area panel **When** I click delete **And** I confirm delete **Then** I do not have a focus area	The user should be able to delete a focus area.

TC 6.9 - Assets in Map-wide and Focus Area	Expected Results	
Given I have a focus area **And** I am on the assets panel **And** I select a focus area in the select focus area dropdown **When** I enable assets **And** I select map-wide in the select focus area dropdown **And** I enable assets **And** I am on the focus area panel **Then** I see a focus areas enabled assets **And** I see map-wide enabled assets	The user should be able to enable assets for a focus area and for map-wide, and then see all of these assets simultaneously on the focus area panel when the areas visibility is enabled.	 Enabled Assets for Focus Area and Map-wide

TC 6.10 - Rename with double click	Expected Results
Given I have a focus area **And** I double click a focus area in the panel **When** I change the name of a focus area	The user should be able to edit the name of a focus area by double clicking on a focus area in the left hand panel.

Then I can edit the name of a focus area	

VISTA Score

TC - 7

TC 7.1 - Filter by VISTA Score on Map	Expected Results	
Given I am on the assets panel **When** I select by VISTA score in the filter mode dropdown **And** I click apply filter **Then** I see all assets on the map	The user should be able to filter assets by VISTA score on the map.	 Filter by VISTA Score

TC 7.2 - Filter by specific VISTA Scores	Expected Results	
Given I have a focus area **And** I select by VISTA score in the filter mode dropdown mode **When** I edit the VISTA score filter checkboxes **And** I select a focus area in the select focus area dropdown **And** I select map-wide in the select focus area dropdown **And** I select by asset type in the filter mode dropdown mode **And** I select by VISTA score in the filter mode dropdown mode **And** I click apply filter **Then** I see assets on the map relevant to the filter	The user should be able to filter assets by specific VISTA scores on the map. The user should be able to navigate between 'select focus area' and 'select filter mode' options with the specified VISTA score filter checkbox state persisting.	 Filter by specific VISTA Scores

TC 7.3 - Reset Filter by VISTA Scores	Expected Results	
Given I am on the assets panel **And** I select by VISTA score in the filter mode dropdown mode **And** I specify VISTA score filter checkboxes	The user should be able to reset the filter checkboxes and see all assets on the map.	 Default Filter by VISTA Score checkboxes

When I click apply filter **And** I click clear all **Then** the filter by VISTA score checkboxes are reset **And** I see all assets on the map		

TC 7.4 - Filter by VISTA Score in Focus Area	Expected Results	
Given I have a focus area **And** I select a focus area in the select focus area dropdown **And** I enable assets **When** I click the filter by VISTA score button on an enabled asset **And** I specify VISTA score filter checkboxes **And** I click apply filter **Then** I see assets on the map relevant to the filter in the focus area	The user should be able to show specific assets by VISTA Score within a focus area.	 Filter by VISTA Score in a Focus Area for a specific asset

Pre-conditions: For TC 7.5 you will need a Focus Area and then enable Exposure layers and Assets within that focus area.

It's recommended to use the Newport area for your focus area so you have plenty of assets near overlapping exposure layers, this should make it easier to test the exposure scores. (See images)

TC 7.5 - Filter by VISTA Score for Exposure	Expected Results	
Given I am on the assets panel **And** I click the filter by VISTA score button on an enabled asset **And** I specify VISTA score filter checkboxes **And** I click apply filter **When** I disable exposure layers **Then** I do not see assets on the map	The user should be able to see filter by VISTA Score results change when scores change.	 Filter by VISTA Score - Exposure 3 Same Filter after Exposure layers disabled

Asset Details

TC - 8

Pre-conditions: For TC 8.1 you will need a Focus Area and then enable Exposure layers and Assets within that focus area.

It's recommended to use the Newport area for your focus area so you have plenty of assets near overlapping exposure layers, this should make it easier to test the exposure scores. (See images)

TC 8.1 - Asset Details VISTA Score - Exposure	Expected Results	
Given I have enabled exposure layers **And** I select an asset on the map **And** I see an assets exposure score **When** I disable exposure layers **And** I select an asset on the map **Then** I see the assets exposure score	The user should be able to select an asset and see its VISTA Scores - including Exposure. The user should be able to see the Exposure score of an asset change when Exposure layers are enabled/disabled in close proximity to the asset.	 Exposure Score 3 Exposure Score 2

TC 8.2 - View Dependent Assets - Eye icon	Expected Results	
Given I enable assets **And** I select an asset on the map **When** I click the eye for view dependent assets **And** I click view dependent assets **Then** I see an assets dependencies on the map **And** I see a list of an assets dependencies	The user should be able to see a visual link of an assets dependencies on the map view. The user should be able to see a list of all dependencies for the asset.	 Dependent Assets

TC 8.3 - View Provider Assets	Expected Results	
Given I enable assets **And** I select an asset on the map **When** I click the eye for view provider assets **And** I click view provider assets	The user should be able to see a visual link of an assets providers on the map view.	 Provider Assets

Then I see an assets providers on the map **And** I see a list of an assets providers	The user should be able to see a list of all providers for the asset.	

TC 8.4 - Google Maps Link	Expected Results	
Given I enable assets **And** I select an asset on the map **When** I click the google map link **Then** I see the google map view for an asset	The user should be able to navigate to a google maps street view of a selected asset.	 Google Map Link Street View

TC 8.5 - View dependent assets - Link	Expected Results	
Given I enable assets **And** I select an asset on the map **When** I click the view dependent assets link **Then** I see an assets dependencies on the map **And** I see a list of an assets dependencies	The user should be able to see a visual link of an assets dependencies on the map view. The user should be able to see a list of all dependencies for the asset. The 'eye icon' should turn blue from the link itself being clicked.	 View dependent assets

Exposures

TC - 9

TC 9.1 - Create a Circle User drawn Exposure	Expected Results	
Given I am on the exposure panel **And** I have clicked draw new exposure **When** I click draw circle **And** I click and drag my mouse	The user should be able to create a circle user drawn exposure by clicking and dragging.	 Circle user drawn exposure

Then I create a circle user drawn exposure on the map **And** I see an exposure in the exposure panel		

TC 9.2 - Create a Circle User drawn Exposure with Click	Expected Results	
Given I am on the exposure panel **And** I have clicked draw new exposure **When** I click draw circle **And** I click a desired centre point on the map **And** I enter a circle radius **Then** I create a circle exposure on the map **And** I see an exposure in the exposure panel	The user should be able to create a circle user drawn exposure by clicking and specifying the radius.	 Enter circle radius

TC 9.3 - Create a Polygon User drawn Exposure	Expected Results	
Given I am on the exposure panel **And** I have clicked draw new exposure **When** I click draw polygon **And** I draw a polygon on the map **Then** I create a polygon exposure on the map **And** I see a exposure in the exposure panel	The user should be able to create a polygon user drawn exposure.	 Polygon user drawn exposure

TC 9.4 - Exposure not in focus area	Expected Results	
Given I have a focus area **And** I have a user drawn exposure **And** I am on the exposure panel **And** I select a focus area in the select focus area dropdown	The user should be able to see a 'Not in area' status pill against an exposure layer when it is positioned outside of a selected focus area.	 'Not in area' status pill

When I enable a user drawn exposure **And** I move the user drawn exposure outside of a focus area **Then** I see a not in area status pill		

TC 9.5 - Exposure partially in focus area	Expected Results	
Given I have a focus area **And** I have a user drawn exposure **And** I am on the exposure panel **And** I select a focus area in the select focus area dropdown **When** I enable a user drawn exposure **And** I move the user drawn exposure partially inside of a focus area **Then** I see a partially in area status pill	The user should be able to see a 'Partially in area' status pill against an exposure layer when it is positioned partially inside of a selected focus area.	 'Partially in area' status pill

TC 9.6 - Exposure in focus area	Expected Results	
Given I have a focus area **And** I have a user drawn exposure **And** I am on the exposure panel **And** I select a focus area in the select focus area dropdown **When** I enable a user drawn exposure **And** I move the user drawn exposure inside of a focus area	The user should be able to see a 'In area' status pill against an exposure layer when it is positioned inside of a selected focus area.	 'In area' status pill

Then I see an in area status pill		

TC 9.7 - Edit a User drawn Exposure	Expected Results	
Given I have a user drawn exposure **And** I double click a user drawn exposure in the exposure panel **When** I change the name of a user drawn exposure **And** I move a user drawn exposure **And** I edit the exposure shape **Then** I can edit the name of a user drawn exposure **And** I can move a user drawn exposure **And** I can edit the user drawn exposure shape	The user should be able to rename a user drawn exposure. The user should be able to click a user drawn exposure on the map and move it. The user should be able to double click a user drawn exposure on the map and edit the polygon's vertices.	 Rename a user drawn exposure Move an exposure polygon

TC 9.8 - Cancel Deleting a User drawn Exposure	Expected Results	
Given I have a user drawn exposure **And** I am on the exposure panel **When** I click delete **And** I cancel delete **Then** I have a user drawn exposure	The user should be able to cancel deleting a user drawn exposure and it remain.	 Delete confirmation window

TC 9.9 - Delete a User drawn Exposure	Expected Results
Given I have a user drawn exposure **And** I am on the exposure panel **When** I click delete **And** I confirm delete	The user should be able to delete a user drawn exposure polygon.

Then I do not have a exposure	

Pre-conditions: For TC 9.10 you will need a focus area and a user drawn exposure area positioned outside of the focus area.

TC 9.10 - User drawn exposure VISTA filter	Expected Results	
Given I am on the assets panel **And** I select by VISTA score in the filter mode dropdown mode **And** I specify VISTA score exposure filter to 0 **And** I click apply filter **When** I am on the exposure panel **And** I move the user drawn exposure partially inside of a focus area **Then** I see assets on the map relevant to the filter in the focus area	The user should be able to see filter by VISTA Score results change when scores change relative to a user drawn exposure.	 Filter by VISTA Score, Exposure = 0 Filter by VISTA score, Exposure = 0 with Exposure in the focus area

TC 9.11 - Send a user drawn exposure to the Data Room	Expected Results	
Given I am on the exposure panel **And** I create a new user drawn exposure **When** I click send to data room **And** I confirm sending to data room **Then** I see the exposure has been sent to the data room	The user should be able to send a user drawn exposure layer to the data room for acceptance/rejection by an admin user. The exposure should have a “Sent to data room” status on it and the user should no longer be able to delete or edit the exposure layer unless it is rejected by an admin. The user should still be able to hide/show the sent	 ‘Send to data room’ confirmation popup User drawn exposure has successfully been sent to the data room

	exposure layer.	

Interventions

TC - 10

TC 10.1 - Resources - Show sandbags	Expected Results	
Given I am on the resources panel And I click sandbags When I click show sandbags Then I see sandbag stock locations on the map view	The user should be able to show all sandbag stock locations on the map view.	 Sandbag stock locations

TC 10.2 - Resources - Withdraw Sandbags stock	Expected Results	
Given I am on the resources panel **And** I click sandbags **When** I click manage stocks on a sandbag location **And** I enter an amount to withdraw **And** I click confirm **Then** I see the sandbag stock count update	The user should be able to withdraw stock from a sandbag location and see the locations stock decrease. The user should see the locations stock count change colour (red / orange / green) depending on the % of remaining stock.	 Withdraw sandbags Withdrawn sandbags successfully

TC 10.3 - Resources - Restock Sandbags stock	Expected Results	
Given I am on the resources panel **And** I click sandbags **When** I click manage stocks on a sandbag location **And** I click restock tab **And** I enter an amount to restock **And** I click confirm **Then** I see the sandbag stock count update	The user should be able to restock a sandbag location and see the locations stock increase up to the maximum capacity. The user should see the locations stock	 Restock sandbags Sandbag location restocked successfully

	count change colour (red / orange / green) depending on the % of remaining stock.	

TC 10.4 - Resources - View sandbag inventory logs	Expected Results	
Given I am on the resources panel **And** I click sandbags **And** I have previously withdrawn or restocked sandbags **When** I click view inventory logs And I click export csv **Then** I can see logs of previous sandbag withdrawals and restocks **And** I export the logs as a csv file	The user should be able to see the inventory logs of all sandbag locations in a pop up window. The user should be able to export the inventory logs as a .csv file.	 Sandbag inventory logs  Inventory logs csv file

TC 10.5 - Constraints - Road block segment	Expected Results	
Given I am on the constraints panel **And** I click on road blocks **When** I click draw new road block **And** I draw a segment **Then** I create a new road block segment	The user should be able to create a new road block via 'draw segment'.	 Drawn road block segment

TC 10.6 - Constraints - Road block polygon	Expected Results	
Given I am on the constraints panel **And** I click on road blocks **When** I click draw new road block **And** I draw a polygon **Then** I create a new road block polygon	The user should be able to create a new road block via 'draw a polygon'.	 Drawn road block polygon

TC 10.7 - Constraints - Road block edit	Expected Results	
Given I am on the constraints panel **And** I click on road blocks **And** I have an existing road block **When** I click rename road block **And** I enter a new name **And** I edit the road block shape on the map **Then** I see the road block shape is changed **And** I see the road block name is changed	The user should be able to edit the shape of a road block and edit the name of a road block.	

TC 10.8 - Constraints - Road block recalculation	Expected Results	
Given I have an existing route plan **And** I am on the constraints panel **And** I click on road blocks **When** I create a new road block **Then** I see the route plan recalculate around the road block	The user should be able to recalculate a route plan if a road block is added to an area that affects an existing route plan.	 Existing route plan Route recalculation after road block Route recalculation after multiple road blocks

TC 10.9 - Constraints - Road block delete and recalculate	Expected Results	

Given I have an existing route plan **And** I have existing road blocks affecting a route plan **When** I delete a road block **Then** I see the route plan recalculate	The user should be able to delete a road block that is affecting an existing route plan and see the route be automatically recalculated to the new shortest route.	 Route recalculated after road block deleted
